

FAWOO CANADA Inc Monthly Product Information Release Feb 2011

UL/cUL Approved Color Changing LED Light Panel

Fawoo Canada has released a new series of color changing LED light panels which is ideal for retail store, restaurant, architecture and other applications. This self-contained LED light panel, with RGB LED strips integrated into a 10mm thick acrylic light distribution panel, offers many unique features including:

- Frameless (no need for framing)
- Custom manufactured to any shape and any size up to 4'x8' (minimum 3"x3")
- Multiple control options available include DMX, remote control and stand alone controllers
- Operation in any static color, skipping (jumping)/fading among multiple pre-set colors
- Full RGB spectrum of color can be produced on each panel from pure white to virtually black
- UL/cUL approved (cUL = CSA)

Fawoo Canada Color changing LED light panels are all custom made to your particular requirements at our UL Approved manufacturing facility in Markham, Ontario Canada. Our quick order processing and centralized location permit fast deliveries to anywhere in North America.
