Fixture / Display – LED Light Panels And Bars

Fawoo Canada Inc. introduces “Fixture / Displays – LED Light Panels and Light Bars”. Light draws people’s attention to specific products while adding a clean and fresh look and directly increases awareness and sales of products.

Figure 1

LED PANELS: The Fawoo Canada LED Light Panel capabilities are constantly expanding to new and more innovative ways by our clients. The LED Panels reduce energy costs compared to current lighting applications and can also pay for themselves by becoming a revenue source when advertisements are applied in various applications as seen in Figure 1 - Transit wall and ceiling application. Architects become more creative with the LED panels and start to utilize the panels to add light to object to make them come to life as seen in Figure 2, 3 and 4.

LED LIGHT BARS: The Fawoo Canada LED Light Bars add a real punch with added colour to under counter tops, bulkheads and signage back lighting, as seen in the following pictures.

The LED Light Bars attach to virtually any surface with the three included application systems (Hinge / 2 Way Tape / Magnetic). They can also be placed inside coolers / fridges to add light to products. This additional light makes the product look cleaner, fresher and will draw additional attention to the products to directly increase sales.
