Displays and Menu Boards - LED Light Panels

Fawoo Canada Inc. introduces “Displays and Menu Boards - LED Light Panels”. The customization capability and quality of the LED Light Panels continues to be the strength and justification for using the FAWOO LED Light Panels. The FAWOO clients are evolving the LED Light Panels and other LED Product further to innovative applications.

Figure 1
– Display Case

New store applications are an easy fit when designers and marketing agencies integrate the FAWOO LED Light Panels into displays as shown in FIG 1. The flexibility of the product also allows contractors and designers the ability to make these additions of the LED Light Panels into existing display cases and fixtures. Existing menu boards can also be retrofitted with the LED Light Panels as shown in FIG 2 with minor modifications. To add an additional touch to the LED Panels include a Snap Frame to finish the product when required.
